

Investment Strategy		Current Value																																																	
Investment Policy		Performance (in %)																																																	
The investment strategy of the Sentinel is a trading account traded fully automatically by 1000FTAD Software, broadly diversified manner across a wide range of currency pairs. It is based on a double GRID and smooth sub-martingale trading approach, fully automated, systematically hedged on both sides. The primary objective is to achieve a high expected return with manageable risk. The selection of currency pairs follows a qualitative approach, while the strategy is implemented using a quantitative methodology. Regardless of market conditions, returns can be generated in both rising and falling markets. The strategic objective is to minimize risk within this asset class while targeting a return of 20-30% per annum. The investment strategy focuses on investing in major currencies globally through managed accounts. The strategy allows for up to 100% allocation in a single asset class or the holding of up to 100% of assets in cash.																																																			
Management Commentary		Current value (in %)																																																	
While Trump presented a 28-point peace plan for Ukraine in Geneva, which is being discussed with representatives from the US and Russia, the G20 summit took place in Johannesburg for the first time. Despite the absence of the US, China and Russia, a 122-point declaration was adopted, addressing global imbalances and debt issues, among other things. Meanwhile, in the Yellow Sea, another diplomatic crisis erupted between China and Japan. S&P Global has forecast Chinese GDP growth of 5% between 2025 and 2027. Analysis shows that the economy is expected to perform better in 2025. Stock markets around the world were volatile. A sharp sell-off in the tech sector weighed on US markets, among others. Concerns about an AI network bubble surrounding NVIDIA are weighing on the markets, with typical bubble symptoms evident in heavily overvalued tech stocks. Following MicroStrategy's loss of considerable market value due to the crypto correction, the Bitcoin price came under further selling pressure. Market participants expect another interest rate cut in December, which would put further pressure on the dollar. Meanwhile, the Japanese yen remains weak against both the US dollar and the euro.		<table><tr><th></th><th>Jan</th><th>Feb</th><th>Mar</th><th>Apr</th><th>May</th><th>Jun</th><th>Jul</th><th>Aug</th><th>Sep</th><th>Oct</th><th>Nov</th><th>Dec</th><th>Total</th></tr><tr><td>2024</td><td>1.52</td><td>-0.15</td><td>0.72</td><td>4.11</td><td>3.08</td><td>2.00</td><td>2.92</td><td>5.92</td><td>1.96</td><td>5.15</td><td>7.24</td><td>4.06</td><td>45.75%</td></tr><tr><td>2025</td><td>6.81</td><td>5.28</td><td>-3.32</td><td>11.87</td><td>1.28</td><td>1.21</td><td>1.13</td><td>2.54</td><td>10.85</td><td>14.49</td><td>3.61</td><td></td><td>69.97%</td></tr></table>			Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total	2024	1.52	-0.15	0.72	4.11	3.08	2.00	2.92	5.92	1.96	5.15	7.24	4.06	45.75%	2025	6.81	5.28	-3.32	11.87	1.28	1.21	1.13	2.54	10.85	14.49	3.61		69.97%

Premium	0.00%						

¹ Synthetic Risk Reward Indicator (SRRI): The risk indicator figures were calculated on the basis of the underlying maximum drawdowns in the trading accounts and the underlying maximum volatility. The risk class is shown in the example below:

Risk Assessment and Key Notes

^{2,3} Risk scale from 1 (lowest risk) to 7 (highest risk), where 1 does not imply a risk-free investment. The risk category assigned to this investment strategy or participation certificates is not guaranteed and may change over time.

Terminology

DD (Drawdown): Refers to the peak-to-trough decline during a specific period of an investment.

Vola (Volatility): Indicates the degree of variation in the price of an investment over time.

Performance Calculation

⁴ Annualized return: This represents the average annual return on an investment over a specified period, factoring in the effect of compound interest. It illustrates how much an investor would earn on average per year if returns were distributed evenly over the entire period.

Management Software

⁵ 1000FTAD AG utilizes its proprietary, fully automated foreign exchange trading software for portfolio management. This software is available under license to professional investors, companies, foundations, and high-net-worth individuals, requiring a minimum investment of USD/EUR/CHF 3-10 million. Investors can participate in 1000FTAD AG

General Note / Disclaimer

The information, statements, analyses, forecasts, and concepts in this document do not constitute investment advice, an offer, or an invitation to submit an offer. They provide a brief summary of the key features of the investment strategy and are intended for informational purposes only. All returns, prices, allocations, and other information presented relate exclusively to the strategy of 1000FTAD Software, including investment fees, but exclude open positions (exposure) and the issuer's costs and fees. The value of investments is reported at the end of each financial year. Monthly performance figures are based exclusively on internal communications or quarterly reports from investment partners. Despite utmost care, these preliminary performance figures may differ from the annual results. Past performance is not indicative of future results. The information contained herein cannot replace investor- or investment-specific advice tailored to the individual circumstances of the investor. 1000FTAD AG exclusively offers investments for a limited group of investors within the framework of private placements. The full details of the investment strategy can be found in the information on the business activities of 1000FTAD AG, supplemented by the information on the entrepreneurial capital investment in the form of participation certificates in conjunction with the subscription form and the detailed presentation of the opportunities and risks. They are available in printed form free of charge from 1000FTAD AG, Im Visionshaus, Hauptstr. 29, 9436 Balgach, St. Gallen/Switzerland

These strategies can also be subscribed to through fully regulated license partners of 1000FTAD AG (asset managers) or the investment committee. For more information, contact: invest@1000ftad.ch The actual investment policy may focus on acquiring assets, e.g. only a few currencies. This allocation to a few specific investment sectors may be associated with particular opportunities, but also with corresponding risks (e.g. market narrowness, higher fluctuation margins, etc.). The price or market development of financial products depends in particular on the development of the capital markets, which is influenced by the general situation of the global economy and the economic and political conditions in the respective countries, among other things. The default of an issuer or counterparty can result in losses. 1000FTAD AG only uses part of its available capital as part of its investment strategy. The value of assets denominated in foreign currencies may fluctuate. SWAP, derivative, certificate or CFD transactions may, depending on their purpose, reduce the potential returns or at least increase the risk of loss. A change in the investment policy may change the risk associated with the investment strategy. In addition to the overall business activities of 1000FTAD AG, the investment strategy is only part of a possible performance and therefore exhibits increased volatility due to the techniques used by the asset management, i.e. the unit prices may be subject to greater downward or upward fluctuations even within short periods of time.
